

hello *permanent jewelry*

faq

What is permanent jewelry?

Permanent jewelry is jewelry without a traditional clasp. It is custom fit to you and welded together so you can not take it off.

Can I go through TSA?

Yes, you can. You do not have to take it off for security screening.

Can I wear it in medical procedures like MRIs or surgery?

No, it is highly likely you will be required to remove all jewelry for medical procedures. Permanent bracelets can be removed with scissors. Cut the ring that attaches the jewelry together for the cleanest look. We are happy to reconnect at no charge if the piece was originally purchased at Hello, Retail Therapy.

Can I purchase permanent jewelry as a gift?

Yes! Just purchase a gift card to Hello, Retail Therapy with the amount you would like to cover.

Who should not undergo the permanent jewelry process?

If you have a pacemaker you should not undergo the welding procedure.

Can I get permanent jewelry for my child?

Yes, but a parent or guardian must be present. Children must be at least 10 years old.

Do I need to make an appointment?

Appointments are not necessary if you don't mind possible interruptions. We kindly ask if you're coming with a group to make an appointment so we can better serve you.
